Buyer's Guide

SEALWELD CHAMELEON SEAL

SEALWELD CHAMELEON SEAL SHOULD ONLY BE USED ONLY AFTER ALL CONVENTIONAL SEAT SEALING METHODS HAVE BEEN PROVEN INEFFECTIVE.

Sealweld Chameleon Seal is a proprietary blend of semi-synthetic sealant compounds designed specifically for sealing server valve seat leakage in downstream seating ball and gate valves. Cycle the valve to the fully closed position, flush the body cavity with an approved solvent solution in cases where contaminants have collected in the body cavity.

Inject Sealweld Chameleon Seal directly into the body cavity, DO NOT inject Sealweld Chameleon Seal into the seat sealant injection system. DO NOT overfill the body cavity. DO NOT exceed the maximum body pressure rating during injection. Flush the Sealweld Chameleon Seal from the body cavity with an approved solvent compound PRIOR to cycling the valve to the open position. Dispose of used Sealweld Chameleon Seal in an environmentally responsible manner.

PRODUCT SPECIFICATION	
Base Oil	Semi-synthetic
Colour	Blue
Composition	Thin Paste
Temperature Range	- 05°C to - 330°C - 20°F to + 170°F

SIZE	MATERIAL #
400 lb. drum	421821
110 lb. pail	421820
5 gal pail	421823
10 lb. pail	421819
